

Mini Crane MC10

The mini crane MC10 is with specialized truck chassis, and the traveling speed for the mini crane is about 75km/h. The mini crane MC10 is already registered in China, so the mini crane MC10 is convenient for licensing in China.

The mini crane MC10 is with lifting weight indicator and lifting height limiter for safety.

The mini crane MC10 is with dual power system, so that it can be connected with electrical power for very low running cost.

The mini crane MC10 is with special and more reasonable hydraulic system. Even it is without radiator in summer, the hydraulic oil temperature is still normal.

With new scientific design technology and new material to minimize its weight, the mini crane MC10 is with minimum dimension and weight for the same lifting capacity.

Power: Dual power = electrical motor power 11KW + diesel engine power 83KW

Rated Lifting capacity: 10 tons

Rated Lifting moment: 24KN.m

Max lifting height: 26.5m

Tire: 8.25-16 (with spare wheel)

Machine Weight: 10140KGS

Dimension: 8950*2500*3040mm

Note: All dimensions are approximate. Specifications are subject to change without notice.
